Flow Straightener

Please follow all instructions provided on the enclosed installation sheets. After step 2 5., follow the instruction below to install the enclosed Flow Straightener. Once completed, resume installation with step 6.

Install Flow Straightener

1. With the straight silicone coupler still attached to the upper pipe, align the flow Straightener as shown. (View A)
2. Press the flow Straightener all the way into the pipe until it bottoms out on the outer rim.
3. Be sure that the alignment mark is aligned with the MAF sensor as shown (View B).

CAUTION: PROPER ALIGNMENT WITHIN THE UPPER PIPE IS CRITICAL. IF MIS-ALIGNED REPOSITION THE STRAIGHTNER IN THE PIPE BEFORE INSTALLATION IN THE VEHICLE.
