January 28, 2015

Mazda is pleased to announce the introduction of the 2016MY CX-5. Over the past three years, the CX-5 has built a solid reputation for class-leading dynamic performance, design and technology. The CX-5 is packaged and priced to make it the clear choice among Small CUV shoppers who love to drive and are attracted to the CX-5 blend of style, roominess, powertrain performance and fuel efficiency. Changes to the 2016MY will continue to build customer consideration and sales momentum as all trims receive premium interior design changes, a redesigned front grill and a new fog light surround. In addition, the GT trim will add a striking new 19" alloy wheel design. To further differentiate CX-5 from the crowd, highly stylized LED lighting is available in Touring and GT Technology Packages. Thanks to your great effort and support, the CX-5 launch has experienced great sales success, and we expect to continue this positive momentum with the 2016MY CX-5.

Please continue reading to learn the highlights of the 2016MY CX-5 and consult the CX-5 Spec Deck, Vehicle Order Form and Price Bulletin for all the details.
